

Windows 11 Keyboard Shortcuts Cheat Sheet

Hello!

Here are some handy **Windows 11 keyboard shortcuts** that can really boost your productivity. You can use **Alt + Tab** to quickly switch between open windows, and **Windows + Shift + S** to capture parts of my screen with the Snipping Tool — super useful!

Keep in mind that the Windows key might look a little different depending on your keyboard.

Whether you're multitasking, capturing a screenshot, or just trying to save a few clicks, these shortcuts can help. ✨

General Shortcuts

<u>Shortcut</u>	<u>Description</u>
<u>Alt + Tab</u>	<u>Quickly switch between open windows and apps</u>
<u>Windows + D</u>	<u>Show the desktop (minimize all windows); press again to restore</u>
<u>Windows + L</u>	<u>Lock your PC instantly</u>
<u>Windows + E</u>	<u>Open File Explorer</u>
<u>Windows + I</u>	<u>Open Settings</u>
<u>Windows + A</u>	<u>Open the Quick Settings menu (Wi-Fi, Bluetooth, Brightness, etc.)</u>
<u>Windows + S</u>	<u>Open Search to find apps, files, or web content</u>
<u>Windows + V</u>	<u>Open Clipboard history (must be enabled in settings)</u>
<u>Windows + Shift + S</u>	<u>Launch Snipping Tool for screen capture</u>
<u>Windows + . (period)</u>	<u>Open the emoji picker</u>
<u>Ctrl + Shift + Esc</u>	<u>Open Task Manager directly</u>
<u>Alt + F4</u>	<u>Close the current window or app; on desktop, opens shutdown dialog</u>
<u>Windows + M (Optional)</u>	<u>Minimize all windows</u>

<u>Windows + Shift + M</u> <i>(Optional)</i>	<u>Restore all minimized windows</u>
<u>Windows + P</u> <i>(Optional)</i>	<u>Open display/project options (e.g., duplicate, extend)</u>

Virtual Desktops

Use these to organize different sets of windows by task or project.

Shortcut	Description
<u>Windows + Ctrl + D</u>	<u>Create a new virtual desktop</u>
<u>Windows + Ctrl + Left/Right</u>	<u>Switch between virtual desktops</u>
<u>Windows + Tab</u>	<u>Open Task View to manage desktops and apps</u>

Snap Window Shortcuts

Perfect for multitasking and organizing your screen.

Shortcut	Description
<u>Windows + Left Arrow</u>	<u>Snap the window to the left half of the screen</u>
<u>Windows + Right Arrow</u>	<u>Snap the window to the right half of the screen</u>
<u>Windows + Up Arrow</u>	<u>Maximize or snap to the top half (if already snapped left/right)</u>
<u>Windows + Down Arrow</u>	<u>Minimize or snap to bottom half (if already snapped)</u>
<u>Windows + Z</u>	<u>Open the Snap Layouts menu for advanced snapping options</u>

💡 **Pro Tip:** Learning just a few shortcuts can save you time every single day. Try practicing two or three at a time to make them second nature.
